EXP-2

2. The online hotel room booking website allows users to search for hotels based on destination, dates, and number of guests, offering detailed listings with room options, prices, amenities, and reviews. Users can create accounts, log in, and manage their bookings through a user-friendly dashboard. The booking process includes checking room availability, filling out a booking form, and completing secure payments via an integrated payment gateway. Post-booking, users receive confirmation emails and can leave reviews and ratings. Admins manage hotel listings, room availability, and user accounts through a dedicated admin panel. The website is fully INTERNET PROGRAMMING LAB EXPRIMENTS responsive, ensuring seamless access on all devices. FunctionalitieS

1. HTML Code

Save the following code as index.html. It includes HTML, CSS, and a small JavaScript search interaction. Replace sample records with real data when connecting a backend.

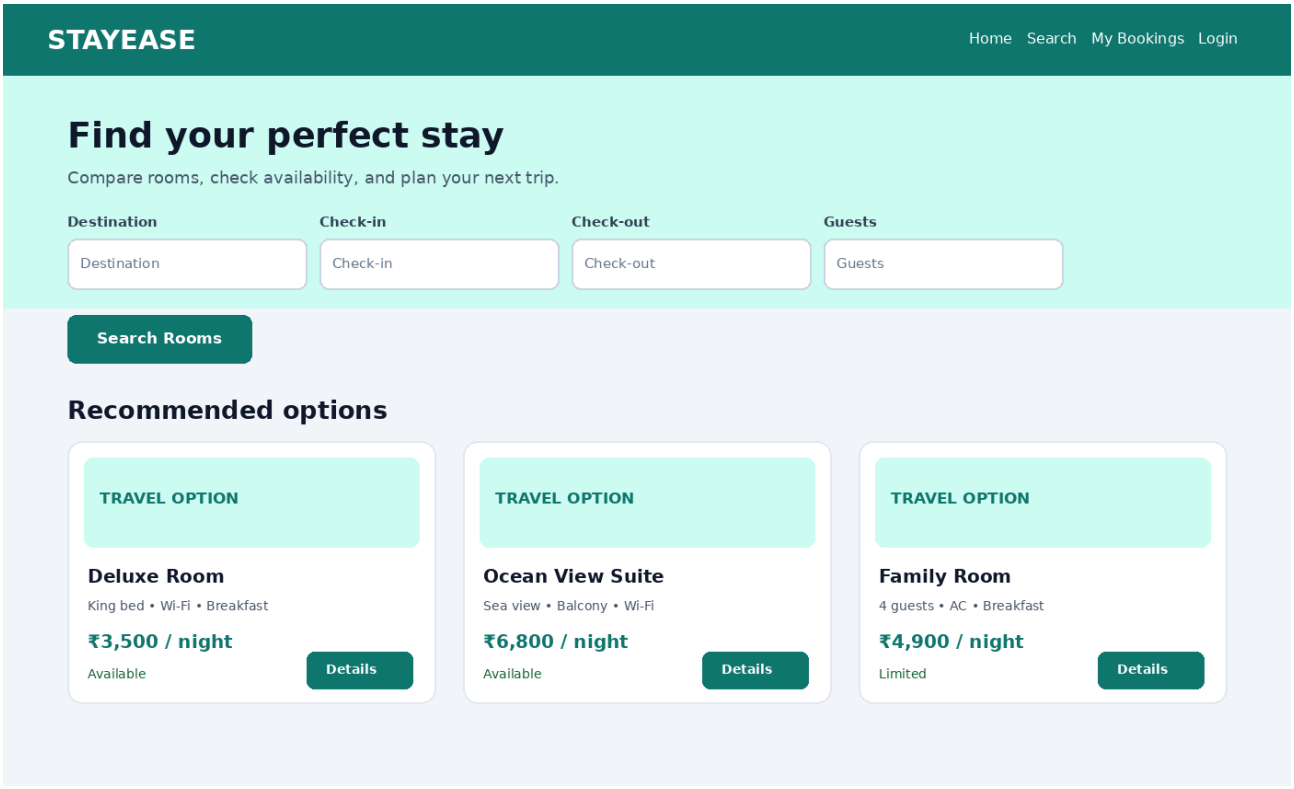

```
