EXP-7

7. The online beauty parlour appointment booking system allows users to browse available services, view stylist profiles, and check appointment slots in real-time. Users can register, log in, and manage their appointments through a personal dashboard. The booking process includes selecting services, choosing a stylist, selecting a date and time, and making secure payments via an integrated payment gateway. Admins can manage service offerings, stylist schedules, and user accounts through a comprehensive admin panel. Users receive appointment confirmation emails and reminders, with the option to reschedule or cancel appointments through their dashboard. The website is fully responsive, ensuring an optimal experience on all devices.

This website helps customers to search for any beauty parlour and book appointments at their preferred date and time.

Functionalities

- Search services by service type, stylist, date and time.
- View service listings with stylist, duration, price and slot availability.
- Select a stylist, date and time, and confirm the booking.
- View appointments in My Appointments and cancel them when needed.
- Download or print the appointment list.
- Responsive layout for desktop, tablet and mobile.
- Backend features (login, payment gateway, confirmation emails, admin panel) are to be connected to this frontend.

1. HTML Code

Save the following code as index.html. It includes HTML, CSS, and a small JavaScript search and booking interaction. Replace sample records with real data when connecting a backend.
