EXP-14

14. ReNewMarket, a dynamic online marketplace, connects buyers and sellers of secondhand goods with ease. The website features a broad range of categories, including electronics, furniture, clothing, and collectibles. Key functionalities include user registration and login, a user-friendly listing creation tool for sellers, and advanced search and filtering options for buyers. Listings include detailed descriptions, photos, and pricing information, with the option to negotiate prices directly with sellers. Users can track their transactions, leave feedback, and manage their favorite items and notifications. The platform also provides secure payment options and a simple process for arranging item pick-ups or deliveries. ReNewMarket aims to provide a reliable and convenient space for exchanging pre-loved items while promoting sustainability.

Functionalities

- Search listings by category, condition, maximum price and city.
- View secondhand listings with price, city and condition.
- Create a new listing as a seller using the Sell an Item form.
- Make price offers to sellers and track them in My Offers, then arrange pick-up.
- Download or print the offers and transactions list.
- Responsive layout for desktop, tablet and mobile.
- Backend features (login, payment gateway, confirmation emails, admin panel) are to be connected to this frontend.

1. HTML Code

Save the following code as index.html. It includes HTML, CSS, and a small JavaScript search, listing and offer interaction. Replace sample records with real data when connecting a backend.
