EXP-16

16. ComplainEase is a robust online platform designed to streamline the process of registering and managing complaints. The website allows users to easily submit complaints by filling out a detailed form that includes categories, descriptions, and supporting documents. Key functionalities include user registration and login, real-time complaint tracking, and status updates via email or SMS. Users can view their complaint history, receive feedback from resolution teams, and provide additional information or evidence if needed. The platform also includes a search feature for browsing common issues and solutions, and a dashboard for managing and resolving complaints efficiently. ComplainEase aims to improve responsiveness and transparency in handling user grievances, ensuring a smooth and effective resolution process.

Functionalities

- Search common issues and solutions by category and keyword.
- View quick-fix solutions for common problems before filing a complaint.
- Register a complaint with category, priority, description and a supporting document.
- Track each complaint, add more information, and view feedback from the resolution team.
- Download or print the complaint history.
- Responsive layout for desktop, tablet and mobile.
- Backend features (login, payment gateway, confirmation emails, admin panel) are to be connected to this frontend.

1. HTML Code

Save the following code as index.html. It includes HTML, CSS, and a small JavaScript search, complaint and tracking interaction. Replace sample records with real data when connecting a backend.
